Dear Harold,

I enclose some articles of interest.

Again, I agree with analysis of The New Orleans "probe".

Evidently, publicity became an end in itself.

This culminated in the conspiracy charge against Bradley and other allegations without merit.

While Shaw is a figure of complex stature, the Russo story is highly unlikely.

Consequently, Epstein and others have given ample ammunition to equate all dissent from The Warren Commission to the often absurd position of N.O.

And they used this with devastating effect.

Again, I doubt Ray knows much - perhaps a contact or two who can't be traced.

At least, that would be S.O.P. for this type of operation.

Sincerely,
